Young Rice Jelly

Asst. Prof. Dr.Wasana Phanurak
Affiliated Organization: Nakhon Ratchasima Rajabhat University

Key Highlights

A health product for picky-eating children and adults with a chewy texture, naturally sweet taste, and no added sugar. Suitable as a snack, it helps boost energy and address loss of appetite.

Natural sweetness

No added sugar

Chewy and easy to eat

More Information

Plai Nano Emulsion Spray for Muscle and Joint Relief

Assoc. Prof. Dr.Somsak Nualkaew
Affiliated Organization: Mahasarakham University

Key Highlights

A Plai nanoemulsion spray using an optimized extract rich in anti-inflammatory compounds to improve skin penetration and relieve muscle and joint inflammation.

Anti-inflammatory Plai extract

Enhanced skin penetration

Relieves pain and inflammation

More Information

Yataprasen

-

Affiliated Organization: Department of Thai Traditional and Alternative Medicine

Key Highlights

A modernized Thai traditional medicine that transforms the Yataprasen formulary into a film-forming spray. Clinical testing showed no skin irritation, with non-inferior efficacy to Diclofenac gel for musculoskeletal pain and inflammation.

Film-forming spray

Clinically tested for safety

Comparable efficacy to standard gel

More Information

Amrukawati Throat Spray

-

Affiliated Organization: Department of Thai Traditional and Alternative Medicine

Key Highlights

A modern throat spray that transforms a long-established Thai traditional formulary, using standardized herbal extraction to help relieve cough, phlegm, and throat irritation.

Modern Thai traditional medicine

Standardized herbal extract

Relieves cough, phlegm, and throat irritation

More Information

Effervescent Turmeric Extract Powder

Assoc. Prof. Dr.Rawiwan Charoensup
Affiliated Organization: Mae Fah Luang University

Key Highlights

An effervescent turmeric extract powder using β-Cyclodextrin technology to improve curcumin solubility and bioavailability. Laboratory studies showed selective inhibition of colon cancer cells, while acute toxicity testing confirmed safety.

Enhanced curcumin solubility

Selective inhibition of colon cancer cells

Safety confirmed

More Information

Red Herbal Pain Relief Oil

Assoc. Prof. Dr.Rawiwan Charoensup
Affiliated Organization: Mae Fah Luang University

Key Highlights

A red herbal pain relief oil combining methyl salicylate, Phlai essential oil, cooling aromatic compounds, and coconut oil to relieve muscle pain, inflammation, and spasms.

Relieves muscle pain

Phlai and coconut oils

Helps reduce inflammation and spasms

More Information

Unomi Mungkut Toothpaste

Assoc. Prof. Dr.Rawiwan Charoensup
Affiliated Organization: Mae Fah Luang University

Key Highlights

A herbal toothpaste combining mangosteen xanthone extract and Korean bamboo salt. Scientific tests confirmed antibacterial activity against Streptococcus mutans and identified 13 bioactive compounds.

Mangosteen xanthone extract

Antibacterial activity against Streptococcus mutans

13 bioactive compounds

More Information

Curcumin-Zinc Skincare for Dark Spots and Melasma

Assoc. Prof. Dr.Nisakorn Saewan
Affiliated Organization: Mae Fah Luang University

Key Highlights

A Curcumin-Zinc Complex skincare innovation that enhances turmeric stability, skin delivery, and anti-melanin efficacy. Clinical testing showed visible results in reducing melasma and dark spots within 4 weeks.

Curcumin-Zinc Complex

Reduces melasma and dark spots

Clinical results within 4 weeks

More Information

Ready-to-Drink Ginger beverage fortified with L-theanine

Kulraphat Wachirasiri, Ph.D.
Affiliated Organization: Medicinal Innovation Center of Mae Fah Luang University

Key Highlights

An effervescent curcumin extract powder using CUR-A-Poly-β-CD technology to improve curcumin solubility and stability. It has demonstrated immunostimulatory effects and a high safety profile in animal and healthy-volunteer assessments.

Enhanced curcumin solubility

Immune support

Safety assessed

More Information

SI-HERB DRESSING : Non-Adherent Herbal Lipido-Colloid Wound Dressing

-

Affiliated Organization: Mahidol University and Bangkok Botanica Co., Ltd.

Key Highlights

A non-adherent wound dressing made from flexible polyester mesh coated with lipido-colloid particles and enriched with Centella asiatica and Aloe vera. It supports a moist wound-healing environment while minimizing pain and tissue trauma during dressing changes.

Non-adherent and pain-reducing

Supports a moist wound environment

Centella asiatica and Aloe vera

More Information

RECAL: High-Protein, Complete-Formula Meal Replacement Product for Weight Control or Weight Loss

Mr.Phuwis Iewsipo
Affiliated Organization: Nutrition Experts Co., Ltd.

Key Highlights

A low-calorie meal replacement formulated with high-quality milk and plant proteins, beneficial fatty acids, and expandable dietary fiber to extend satiety and support weight management.

Low-calorie, high-protein formula

Helps extend satiety

Dietary fiber and beneficial fatty acids

More Information

BioBlend Plus: Thai Probiotics Enriched with Mulberry and Riceberry Germ Extracts

Assoc. Prof. Dr.Doungporn Amornlerdpison
Affiliated Organization: Agri Inno, Maejo University

Key Highlights

An advanced synbiotic formulation that combines selected probiotic strains with prebiotics from mulberry fruit and riceberry germ extract to support gut microbiome balance, digestion, bowel regularity, and immune health.

Probiotics and prebiotics

Gut microbiome balance

Supports digestion and immunity

More Information

Chiwadi Organic Coconut Blossom Seasoning Sauce

Saraphi Yuadyong
Affiliated Organization: Chiwadi Products Co., Ltd

Key Highlights

A plant-based seasoning made from natural amino acids and minerals in coconut flower nectar. It provides balanced umami flavor without animal-derived ingredients or synthetic flavor enhancers, with 190 mg of sodium per serving.

Plant-based umami flavor

Free from animal-derived ingredients

190 mg sodium per serving

More Information

Coffogenic Drink: Dietary Supplement Coffee Pulp Extract

Naruemon Taksa-Udom
Affiliated Organization: Hillkoff Co., Ltd. and Chiang Mai University

Key Highlights

A functional drink that upcycles coffee fruit residues into a wellness product. Clinical research found improved lipid, insulin-resistance, and inflammation indicators in overweight individuals with high blood lipids.

Upcycled coffee fruit

Human clinical research

Supports healthy blood lipid management

More Information

Super Concentrate Gen. II: Multi-Dimensional Anti-Aging Peptide Serum

Affiliated Organization: Mahidol University and Siam Bioscience Co., Ltd.

Key Highlights

An advanced anti-aging serum powered by bioactive peptides and multiple growth factors to support skin renewal and visible anti-aging benefits. Product testing indicated visible improvement in fine lines within 7 days.

Bioactive peptides

Multi-Growth Factor Technology

Testing results within 7 days

More Information

ImuneUp: Dietary Supplement from Golden Cordyceps in Oral Powder Form

Wayuree Sukrungruangsanti
Affiliated Organization: Bist Inno Reform Co., Ltd.

Key Highlights

A convenient powder-shot dietary supplement combining Golden Cordyceps mycelium, 8 probiotic strains, and vitamins C, B6, and B12 to support gut balance and immune function, with no added sugar or milk ingredients.

Golden Cordyceps

8 probiotic strains

Ready-to-take powder shot

More Information

Nutriflow: Low-GI Meal Replacement for Blood Sugar Control

Assoc. Prof. Dr.Thunnalin Winuprasith
Affiliated Organization: Mahidol University

Key Highlights

A low-GI meal replacement (GI < 50) with digestion-resistant complex carbohydrates and Adaptive Flow technology for stable dispersion, water retention, and precise adjustment across four IDDSI texture levels in one sachet.

GI below 50

Adaptive Flow Technology

4 IDDSI texture levels

More Information

Dent Booster: Desensitizing Gel for Tooth Sensitivity

Asst. Prof. Dr.Khrongkhwan Akkarachaneeyakorn
Affiliated Organization: Kasetsart University

Key Highlights

Dentbooster is a desensitizing gel enriched with Amorphous Calcium Phosphate Nanoparticles that penetrate and seal open dentinal tubules for rapid tooth-sensitivity relief. It also promotes enamel remineralization and supports convenient home use.

Amorphous Calcium Phosphate nanoparticles

Seals dentinal tubules

Promotes enamel remineralization

More Information

Wang Som Sa Model: From Thai Biodiversity to a Zero-Waste Wellness Ecosystem

Asst. Prof. Dr.Chanai Noisaeng
Affiliated Organization: Rajamangala University of Technology Thanyaburi

Key Highlights

A zero-waste wellness ecosystem that transforms every part of Som Sa (bitter orange) into high-value wellness, beauty, spa, and functional food products through advanced bio-extraction technologies.

Advanced bio-extraction innovation

Uses every part of Som Sa

Zero-waste model

More Information

Modgut: Gut Microbiome Testing for Personalized Weight Management

Assoc. Prof. Dr.Supapon Cheevadhanarak and Asst. Prof.Sawannee Sutheeworapong

Affiliated Organization: King Mongkut's University of Technology Thonburi and Mod Gut Co., Ltd.

Key Highlights

A gut microbiome testing service using 16S rRNA sequencing to analyze gut microorganisms and support personalized nutrition and weight-management recommendations.

16S rRNA Sequencing

Gut microbiome analysis

Personalized nutrition

More Information

VAYU BREATHOLOGY G-300: Breath-Based Blood Glucose Monitoring Device

Thearasit Nasamphan, Ph.D.
Affiliated Organization: Health Innovision Co., Ltd.

Key Highlights

A portable Point-of-Care Testing device that analyzes acetone in a breath sample to estimate blood glucose within 30 seconds –without a blood draw.

Breath acetone analysis

Non-invasive glucose monitoring

Portable Point-of-Care Testing

More Information

Nutrical: Complete Medical Nutrition Formula for Individuals with Diabetes

Asst. Prof. Dr.Supat Chaiyakul
Affiliated Organization: Mahidol University

Key Highlights

A complete medical nutrition formula for individuals with diabetes, using lactose-free milk and a low glycemic index of 27.86. Clinical monitoring showed improvements in blood glucose, insulin, and triglyceride levels.

Lactose-free formula

GI 27.86

Medical nutrition for diabetes

More Information

Ready-to-Use *Bacopa monnieri* (Brahmi) Extract in Powder Form

Asst. Prof. Dr.Prapapan Temkijtavorn
Affiliated Organization: Naresuan University

Key Highlights

A high-quality ready-to-use powdered Bacopa monnieri extract for health, dietary supplement, and elderly-product industries, produced in a GMP-certified pilot plant and certified for herbal raw-material quality by the Thai FDA.

Powdered Bacopa monnieri extract

GMP standard

Thai FDA-certified raw-material quality

More Information

Albuminuria Test Kit for Early Chronic Kidney Disease Screening

Prof.Nattachai Srisawat, M.D., Ph.D.
Affiliated Organization: Chulalongkorn University

Key Highlights

A point-of-care urine test for microalbumin screening that enables simple, convenient, and easy-to-interpret initial kidney-health checks. It supports earlier awareness and timely follow-up when abnormal results are detected.

Urine microalbumin screening

Self-testing

Supports early risk detection

More Information

Acanthus MicroCare Hair Tonic: Thai Herbal Microemulsion Innovation for Hair & Scalp Wellness

Asst. Prof. Dr.Suradwadee Thungmungmee
Affiliated Organization: Rajamangala University of Technology Thanyaburi

Key Highlights

A Thai botanical hair-care innovation combining concentrated Acanthus ebracteatus extract with microemulsion technology to enhance penetration and support hair-root growth. Its low-energy process is scalable for community enterprises, SMEs, and larger manufacturers.

Acanthus ebracteatus extract

Nano-scale microemulsion

Low-energy production process

More Information

Plant-Based Avocado Salad Dressing Enriched with Macadamia Milk

Asst. Prof. Dr. Janjira Phakawan
Affiliated Organization: Rajamangala University of Technology Thanyaburi

27

Key Highlights

A plant-based avocado salad dressing enriched with macadamia milk, free of dairy and eggs. Its macadamia-milk hydrocolloid emulsion system provides stability and a creamy texture, and the product is commercially distributed.

Plant-based, dairy-free, and egg-free

Creamy texture

Industrial-scale production

More Information

Soy Milk Powder Blended with Vietnamese Coriander Extract and Mulberry Leaf (MUVITA)

Prof. Jintanaporn Watthanathorn
Affiliated Organization: Khon Kaen University

Key Highlights

A powdered soy milk beverage blended with Vietnamese coriander and mulberry leaf extracts. One sachet daily for 30 days was associated with reduced stress, depression, and anxiety, improved sleep quality and working memory, and balanced bone metabolism.

Vietnamese coriander and mulberry leaf

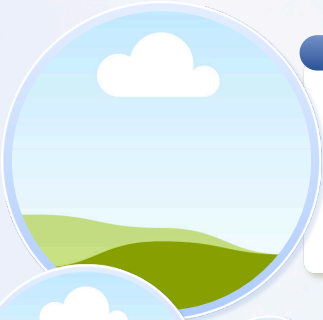

30-day consumption data

Supports sleep and memory

More Information

Artificial Tears 0.28% Sodium Hyaluronate: VISMAX

Dr. Sujintana Tantaterdtham, M.D.
Affiliated Organization: Ultra Medica Co., Ltd.

Key Highlights

Preservative-free 0.28% sodium hyaluronate eye drops for dry-eye relief and ocular-surface recovery, in sterile single-dose vials.

Long-lasting corneal adhesion

Preservative-free formula

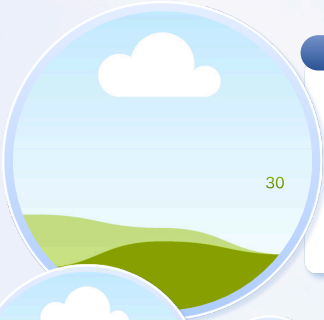

Sterile single-dose vials

More Information

BluRibbon & BluGel: Wound Dressing Patch and Medical Gel

Pharmacist Adisorn Apasuthirat
Affiliated Organization: Novatech Healthcare Co., Ltd.

Key Highlights

An advanced wound dressing sheet and gel using Nanobiocellulose and Blue Nano Silver for chronic wounds, including diabetic ulcers, pressure sores, and burns.

Nanobiocellulose and Blue Nano Silver

For chronic and hard-to-heal wounds

Color-change replacement indicator

More Information

PineCoBeads: Biodegradable Beads from Pineapple Rhizome Starch

Assoc. Prof. Dr.Taweechai Amornsakchai
Affiliated Organization: Mahidol University

Key Highlights

A circular beauty innovation that turns upcycled pineapple stem starch into biodegradable microbeads for skincare and cleansing products. Their smooth, spherical structure enables gentle exfoliation, while their stability supports rinse-off formulations.

Upcycled pineapple stem starch

100% biodegradable

Gentle exfoliation

More Information

BioBlend+ Calcium: Fish-Derived Calcium Innovation for Bone Longevity

Affiliated Organization: Maejo University and S.T.D Metics Co., Ltd.

Key Highlights

A bio-based calcium supplement made from MCHC derived from Maejo Siam hybrid catfish bone. It provides naturally occurring calcium and phosphorus in a bone-like mineral matrix, designed to support bone strength and musculoskeletal health.

Fish-derived MCHC calcium

Calcium ratio similar to human bone

Naturally occurring calcium and phosphorus

More Information

Sustainable Highland Tea Innovation

Affiliated Organization: Department of Agriculture

Key Highlights

A research-driven model that advances Northern Thai tea through smart farming, processing, product innovation, and market development. It works with 120 farmers across six community enterprises, creating value-added tea products and new community income opportunities.

120 participating farmers

Five value-added tea products

Tea tourism and training

More Information

Jasmine Rice Young Leaf Tea

Asst. Prof. Dr.Supat Chaiyakul
Affiliated Organization: Mahidol University

Key Highlights

A research-based innovation that transforms young leaves of Thai Hom Mali Rice 105 into high-value tea and functional food ingredients. Its integrated cultivation and harvesting system supports standardized, high-quality raw materials for commercial wellness products.

Integrated cultivation and harvesting

Bioactive-compound analysis

High-quality standardized raw materials

More Information

Cassava-based Medical Nutrition: Complete Nutrition Formula from Thai Cassava Starch

Asst. Prof. Dr.Supat Chaiyakul
Affiliated Organization: Mahidol University

Key Highlights

A research-driven medical nutrition innovation that uses modified Thai cassava starch as a carbohydrate source in a complete nutritional formula for recovery, older adults, and individuals requiring additional energy and nutrient support.

Modified cassava starch

Complete nutrition formula

GI values of 32.4-36.9

More Information

Rice Panicle Bioactive Innovation: From Thai Rice to Advanced Skin Wellness

Affiliated Organization: Mae Fah Luang University

Key Highlights

A bioactive extraction innovation that transforms rice panicles into high-value ingredients for cosmeceutical and wellness applications. The extract contains Gamma Oryzanol and Ferulic Acid, with antioxidant activity and reported non-irritating properties for skin.

Rice panicle extract

Gamma Oryzanol and Ferulic Acid

Reported non-irritating to skin

More Information

Arabica Coffee with Yamabushitake (Lion's Mane) Extract

Affiliated Organization: Rajamangala University of Technology Lanna

Key Highlights

A functional coffee blend combining locally grown Arabica coffee from Nan Province with Lion's Mane mushroom extract, designed to support cognitive wellness and everyday vitality in an easy-to-consume format.

- Nan-grown Arabica coffee
- Lion's Mane mushroom extract
- Supports cognitive wellness

More Information

Thai Cacoa Nibs: Naturally Functional Cacao

Asst. Prof. Dr.Chinanart Wittayapraphakorn
Affiliated Organization: Rajamangala University of Technology Lanna

Key Highlights

Premium roasted cocoa nibs developed with local producers using improved cacao production and processing techniques. They retain naturally occurring antioxidant compounds and plant-based bioactives associated with cardiovascular and overall wellness.

Roasted cocoa nibs

Naturally occurring antioxidants

Developed with local producers

More Information

Olikap™ Mulberry Whitening Gel: Peroxide-free Whitening with Nano Calcium Phosphate

Asst. Prof. Dr.Khrongkhwan Akkarachaneeyakorn
Affiliated Organization: Kasetsart University

Key Highlights

A peroxide-free tooth-whitening gel combining mulberry-derived actives with nano calcium phosphate. It brightens teeth while supporting enamel remineralization and sensitivity care for convenient at-home oral care.

- Peroxide-free whitening
- Nano calcium phosphate
- Supports enamel remineralization

PROTINOS - High-Protein Noodle Innovation for Stronger Muscles

Dr.Peerapong Ngamnikom and Dr.Siriluck Surin
Affiliated Organization: Rajamangala University of Technology Thanyaburi

Key Highlights

PROTINOS is a high-protein dried noodle made from egg white and soy protein using enzyme technology for a smooth, chewy texture. Each serving provides 20-30 grams of protein and 4,000-10,000 mg of BCAAs to support muscle growth and maintenance.

High-protein noodles

20-30 g protein per serving

4,000-10,000 mg BCAAs

More Information

Nanozeree: Synbiotic Gummy Dietary Supplement Product

Affiliated Organization: Prince of Songkla University

Key Highlights

Nanozeree is an encapsulated synbiotic gummy containing Lactobacillus rhamnosus and Bifidobacterium animalis, combined with turmeric extract. Its Robotic Nanoencapsulation technology protects probiotics and delivers them to the intestine.

Synbiotic gummy

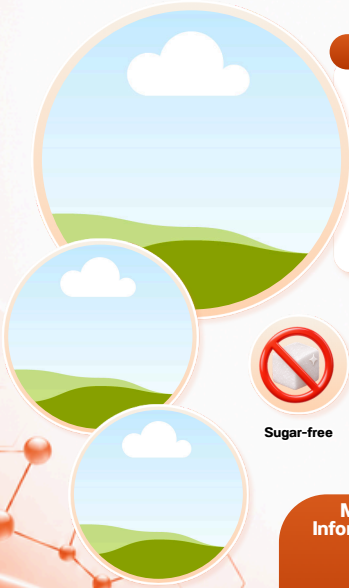

Around 1 billion CFU probiotics

Robotic Nanoencapsulation

More Information

Mind Kombucha POP: Synbiotic Kombucha Powder

Key Highlights

Mind Kombucha POP is a convenient, sugar-free synbiotic powder combining selected Lactobacillus strains, kombucha-derived components, mulberry, and prebiotic fiber to support everyday digestive wellness.

Sugar-free

Over 20 billion CFU per sachet

Kombucha, mulberry, and inulin

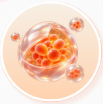

More Information

Songkhla Mini Mango: Probiotic Supplement

Affiliated Organization:

Key Highlights

A Thai gut-health innovation combining probiotics, microencapsulation technology, and Songkhla Mini Mango flavor. The technology helps protect live probiotics and supports their delivery to the colon.

Microencapsulation technology

Helps protect probiotics

Songkhla Mini Mango flavor

More Information

HARUNA: Natural Prebiotic

Affiliated Organization: VTK Inno Group Co., Ltd.

Key Highlights

HARUNA is a 100% natural prebiotic vegetable powder using resistant starch technology. It supports beneficial gut microorganisms, digestive regularity, and a balanced intestinal environment.

100% natural prebiotic powder

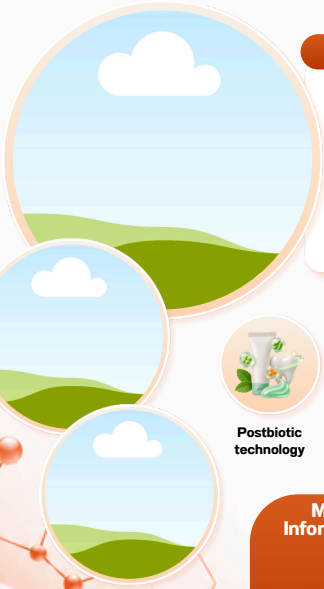

Resistant starch technology

Supports beneficial gut microorganisms

More Information

Elite Smile: Postbiotic Toothpaste

Prof. Dr.Rawee Teanpaisan
Affiliated Organization: Prince of Songkla University

Key Highlights

Elite Smile is a postbiotic toothpaste that combines beneficial bacterial derivatives with more than 12 botanical ingredients. It is designed to support a balanced oral microbiome, everyday oral health, and long-lasting freshness.

Postbiotic technology

More than 12 botanical ingredients

Supports oral microbiome balance

More Information

ALTERMED: Biotica Postbiotics Relief Mask

Key Highlights

ALTERMED Biotica Postbiotics Relief Mask is a soothing facial mask that uses postbiotic technology to calm visible signs of irritation, support skin recovery, and reinforce the skin's natural protective barrier.

Postbiotic facial mask

Soothes visible irritation

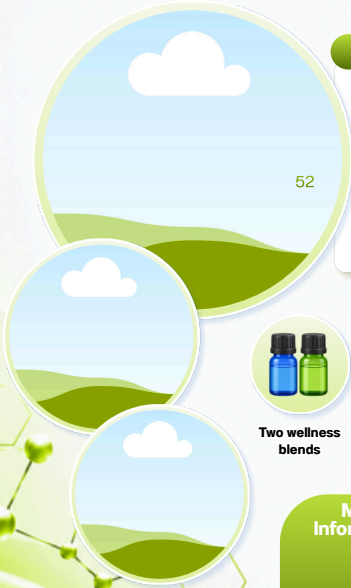

Supports the skin barrier

More Information

Functional Aromatic Blends for Relaxation, Refreshment, and Rest

Affiliated Organization: Prince of Songkla University

Key Highlights

A research-based essential oil roll-on platform using Functional Fragrance Design and Synergistic Blending for daytime refreshment, evening relaxation, and sleep preparation. Each blend considers chemical composition and molecular volatility to create a balanced and distinctive sensory identity.

Two wellness blends

Molecularly informed fragrance design

Balanced, distinctive scent profile
